

This briefing is advisory in nature and does not replace the responsibility of the pilot in commands obligation to use sound judgment regarding skill level, experience and aircraft suitability.

The RAF makes no warranty for the condition of the runway surface or suitability of the airstrip environment.

McIntosh Reserve

Georgia

Coordinates: 33°26'44.4"N 84°57'35.7"W

Airstrip Open for this RAF Weekend only.

November 3-5, 2017

Runway profile, orientation, elevation

Runway Length(estimate): 2800' usable, 3380' total (580' on SE end not usable)

Runway Width (estimate): 200'

Runway Location (estimate): 33.445665, -84.959911 (ATL VOR R252 @ 29nm)

Runway Elevation (estimate): 770'

Runway: 32/14

Special Considerations or Operations

Airstrip located at western edge of Atlanta Hartsfield Mode C veil (Class B ceiling 4000').

Caution- Be aware of the following items

Drain culvert cuts across runway at 580' from SE edge of runway.

50' trees located at each end of the runway.

Consider density altitude and runway conditions prior to takeoff!

Runway width narrows midfield to 200'.

Runway used by RC aircraft.

Horse trails along tree line east of runway.

Boat ramp access road along tree line west of field.

Runway area not fenced.

Use caution for wildlife or park visitors crossing runway

Runway is smooth but has gentle upslope starting 800 feet from northern end, and the entire runway width slopes gently towards the river

Terrain rises abruptly starting at the tree line on the southern end of the runway

This briefing is advisory in nature and does not replace the responsibility of the pilot in commands obligation to use sound judgment regarding skill level, experience and aircraft suitability.

The RAF makes no warranty for the condition of the runway surface or suitability of the airstrip environment.
