Subject: Emergency use of airstrips

To all interested parties:

Emergency use of airstrips that I personally know about includes the following:

Reds Horse Ranch:

Emergency evacuation of horseback rider due to seizure--see forest service records.

Flying B:

Emergency evacuation of guest due to split pelvis.

Flying B:

Emergency evacuation of rafters-unsafe waters.

Sulfur Creek: I left my oxygen bottle with a cardiac distress patient who insisted that I sell them the unit.

Idaho/Montana:

Fires suppression: esp. last year.

I also hear stories of salt licks placed on upper middle fork strips.

John Hirons.
